Inputs:	1
Code:	1

mycsvwrite.m

```
% This function generates a csv file with a given header_row and  
delimiter.
```

Inputs:

filename: The filename (or path).
data: The array *that needs to be saved..*
header_row: The header_row *given as a string, separated by delimiter.*
delimiter: Delimiter that *separates the array elements.*

Code:

```
function mycsvwrite(filename, data, header_row, delimiter)  
  
fid = fopen(filename, 'w');  
fprintf(fid, strcat(header_row, '\n'));  
fclose(fid);  
  
dlmwrite(filename, data, '-append', 'delimiter', delimiter);
```
